

Inkillay

Tafí del Valle genetics

“..once the seed touches the ground”

Inkillay is a company dedicated to perfecting the cultivation of medicinal-grade Cannabis based in Tafí del Valle at 2000 MASL in the province of Tucumán, northwestern Argentina.

Mission: To perfect the cultivation practices of high-altitude medicinal-grade Cannabis, employing genetic improvement processes to develop top-quality varieties. Our aim is to foster a sustainable industry with high productivity and energy balance.

Vision: The sustainable production of Cannabis responds to a cultural change in the health paradigm where human beings understand ourselves as part of an environment that we must respect. At Inkillay SAS we uphold that vision at each stage of cultivation to offer high quality Cannabis with production, scientific and ethical standards in accordance with the needs of the world to come.

Purpose: To cultivate top-quality high-altitude Cannabis to supply the pharmaceutical, cosmetic and food industries at a national and international level.

Objective: To become the first private company in Argentina to achieve the production of medicinal-grade cannabis flowers for export and develop an attractive investment model for global capital.

Inkillay is a company dedicated to the cultivation of one of the best Cannabis in the world. Why? It's simple: our production philosophy, based on the alliance between technology and nature, seeks to collect the secrets of the earth to contribute to a **new culture of well-being**.

The attention begins **once the seed touches the ground** through rigorous traceability procedures and 100% organic cultivation. This ensures that the purity of the elements reaches where it is most needed: the health and well-being of those who choose our Cannabis.

100% Legal Medicinal Cannabis

Our project is approved by the Ministry of Health. We use certified seeds provided by INASE and collaborate with professionals from INTA in various research lines to enhance the quality of our production. Currently, the first phase of our high-mountain cultivation center is fully operational, **ready to offer the best of Argentina to the world**.

That is why for us Inkillay ("my flowery garden" in Quechua) is more than a Cannabis company: it is a project where technology, wisdom and first-rate productive development are integrated for the installation of a unique enterprise of its kind.

Why Tafí del Valle?

The incomparable bioclimatic characteristics of this valley related to its altitudinal gradient, thermal amplitude and insolation yield have a highly positive effect on the development of the best genetic varieties and chemotypes. This pristine environment with its clean air and pure water, the greatness of the mountains and the mystique of nature that surrounds Tafí del Valle are part of the secret of the best traditions that we want to honor at Inkillay.
